The potential for liability exists in every aspect of a business's operations. Such claims can damage a business's reputation and affect their ability to compete.

The Alliant Loss Control Liability Inspection Training will show participants how to identify opportunities to reduce the frequency and severity of loss by evaluating the physical conditions, facility usage and human factors areas of a business.

Who should attend: decision-makers, operation managers, and safety and risk management staff, as well as, maintenance and supervisory staff that perform regular safety and liability inspections. This program will cover the following topics:

1. Overview of General Liability Risk
2. Common Industry References and Best Practices
3. Managing Vendors and Contractors
4. Organizing the Inspection
5. Preventing Slips, Trips And Falls
6. Workplace Security
7. Fire Hazards
8. Life Safety Issues
9. Swimming Pools
10. Parks
11. Signage
12. Documentation and Recommendations

Participants will also be provided with electronic templates, checklists, and other resources for conducting general liability evaluations. There will be case studies with breakout groups learning how to properly inspect a property for general liability risk using best risk management practices.
